

I know this letter is getting to you late but this is what I have to say about this subject.

I am an Over-the-Road truck driver and I don't know all of the radio stations that carry up-to-date traffic and weather conditions. I look to XM Satalite Radio for these conditions to determine weather or not I can go through or around a particular city. If you dedide to force XM to quit offering this service, you will be creating bigger traffic jams in and around major metro. areas, because, not only the truck drivers, but also turists and other automobile drivers that are unfamiliar with the area will be unable to find out what roads are illadvised to travel due to bad weather or traffic jams.

XM's traffic and weather service is a valuble part of programing that I use quite often. Please let XM continue providing this service.

Thank you for your consideration in this important matter.
